

Robert F. Faulkner, D.D.S., Inc.

Maxillofacial Prosthodontist

The Immediate Load Restoration:
Criteria For Successful Clinical Treatment

Course Description:

This two day course will combine a variety of didactic, lecture, and laboratory procedures to facilitate the learning experience and enable the clinician to effectively communicate with the implant surgeon and laboratory technician. In addition, proper sequence of the clinical treatment for the patient will be discussed in detail.

Course Objectives:

Upon completion of this course the clinician will be able to:

- Properly diagnose, treatment plan, and sequence the treatment necessary for delivering an immediate load restoration.
- Review established protocol for immediate loading with dental implants in the edentulous mandible.
- Establish effective communication with the implant surgeon and laboratory technician, as well as, the patient.
